Cardinia Shire Council

The Innovation Journey at Cardinia Shire Council

18th April 2018
Cardinia Digital Transformation

Why did Cardinia choose the Digital Transformation Path?

We either had to disrupt or be disrupted

- Were one of the most indebted Councils in Victoria.
- Still have one of the lowest staffing ratio’s in the sector.
- Ran underlying deficits – prior to fairer rates.
- Growth is currently at 6 families a day.
- Poor IT Infrastructure
- Low usage of Corporate Information System and was not a valued function
- Promises had been made in the past not kept

Cardinia Digitisation Centre – what is it?

All incoming Council mail (physical and electronic) is digitally processed through multiple software algorithms that read, assess and store the mail into the corporate document management system, automatically creating staff workflows for action where required.
Cardinia Digitisation Centre – what’s gone right?

- Cost savings
- Accuracy of work
- Elimination of human error
- Release of resources
- Preparing staff for the future of work
Cardinia Digitisation Centre – what’s gone wrong?

• By its very learning nature there are exceptions in outcomes – it learns
• Staff anxiety over their jobs
• Internal staff perception – loss of control
Cardinia Digital Transformation – lessons learnt?

• Keep asking **WHY**?
• Because it was always been done that way does not make it right.
• Change is hard and people will find innovative (!?) ways to resist.
• It’s OK to fail.
